F1 Description of the Drawing -.

F2 --- Figure 1-1 is the comparison of abscess size with various formulations.

IN THE CLAIMS

✓
Please amend Claim 263 as follows:

10
263. (Fourth Amendment) A method of (preventing) treating a topical infection resulting from a condition or disease in a human involving underperfused tissue and pathological tissue in humans, the method comprising the administration of an effective amount of an anti-metabolite agent and a sufficient amount of a form of hyaluronic acid selected from the group consisting of hyaluronic acid and its non-toxic salts and combinations thereof to facilitate the transport and penetration of the agent at a site to be treated by the agents passing through the tissue through the cell membranes into the individual cells to be treated wherein the molecular weight of the form of hyaluronic acid is in the range of 150,000 to 750,000 daltons, and said amount of the form of hyaluronic acid is sufficient to provide a dosage greater than 10mg and less than 3000mg.
